

Power Transmission and Distribution Lab

Description
"The Power Transmission and Distribution Lab is a cutting-edge facility dedicated to researching, designing, and testing modern power distribution and transmission systems. Equipped with state-of-the-art equipment and software, our lab enables students, researchers, and industry professionals to explore innovative solutions for efficient, reliable, and sustainable electric power delivery.

Sr.	Apparatus Name
1	Transmission Line Modules
2	Power Supply Y-0059/1
3	Power Switch Y-0059/2 Y-0059/6
4	Network Analyzer Y-0059/5 Y-0059/3
5	Line Modle Y-0059/4
6	Current Distributor Y-0059/7
7	Line Compensation Y-0059/8
8	Current Transformer Y-0059/9
9	Voltage Transformer Y-0059/10
10	Ohmic and Inductive Load Y-0059/11 Y-0059/12
